

Juan Paredes

Full-Stack Web & Mobile Developer

San Cristóbal, Venezuela | +58 424-7836896 | jdpgparedes@gmail.com | linkedin.com/in/juanparedesg | github.com/JuanD-2005

Computer Engineering student (UNET, expected 2027 — 1st place on the Honor Roll, 8.34 GPA) with hands-on full-stack experience (Python, React, Django, Node.js) and a foundation in Machine Learning. Analytical mindset, passionate about solving real problems with technology.

EDUCATION

Computer Engineering (8th Semester), *Universidad Nacional Experimental del Táchira (UNET)* Sept 2022 – 2027

- GPA: 8.34/9.
- 1st Place on the Honor Roll: Professional Cycle (Terms 2024-3, 2025-1) and Basic Cycle (Terms 2024-1, 2022-3).

English C1 - Full Professional Proficiency, *Formación Permanente UNET*

2024

SKILLS

Frontend & Mobile: JavaScript/TypeScript, React, Next.js, Tailwind CSS, HTML5/CSS3, Kotlin, Android Studio.

Backend & Databases: Python (Django), MySQL, Java, PostgreSQL, Node.js (Express), MongoDB, Firebase.

Tools & DevOps: Docker, Git/GitHub Actions, RESTful APIs, Notion, Figma, Articulate Storyline 360.

AI & Machine Learning: Python (TensorFlow, PyTorch, Scikit-Learn), AutoML, MATLAB.

Languages: Spanish (Native), English (C1-Fluent), French (Basic).

EXPERIENCE

Freelance Developer / Independent Consultant

2024 – Present

- Built full-stack web applications with efficient interfaces (**React, Next.js**) and optimized UI/UX.
- Designed RESTful APIs and scalable databases (**Node.js, PostgreSQL, MongoDB**), ensuring data security.
- Managed the product lifecycle and automated deployment pipelines (**Git, Docker, GitHub Actions**).

Technical Instructor, UNET - Continuing Education

2024 – Present

- Programming Instructor: designed and taught the "**Game-Oriented Programming**" course for young talent (next cohort: August 21, 2026).
- Math I Tutor: supported engineering students with logical problem-solving and pedagogical guidance.

E-Learning Developer (Contract), BeeLearnStudio

02/2026 – 04/2026

- Developed and built 6 interactive learning modules across 2 projects using Articulate Storyline 360.
- Created dynamic user experiences, integrating professional multimedia for educational settings.

FEATURED PROJECTS

Portal Académico EVEM & DIM 2026 / *Full-Stack Development*

- Built the official portal and a full mass-registration system for a national academic event (UNET/ULA).
- Successfully managed registration for 100+ users through a relational database implementation.

Technologies: PHP, MySQL, Vanilla JavaScript, HTML/CSS, jsPDF, RESTful APIs.

DJANGO-UNETX / *Full-Stack Development*

- Designed a university Twitter clone with asynchronous updates via HTMX, cutting latency and improving fluidity without page reloads.
- Structured a scalable Django backend able to safely handle concurrent interactions.

Technologies: Django, Python, HTML, CSS, JavaScript.

MIUNET / *Mobile Application*

- Built a native Kotlin app for academic management, centralizing information in an intuitive interface.
- Integrated real-time sync with Firebase, ensuring data availability over unstable connections.

Technologies: Kotlin, Firebase, Android Studio.

CERTIFICATIONS & PARTICIPATION

- Recognition: Web Design for the "ONE CHANGES THE WORLD" campaign, Rotary Club San Cristóbal (2025).
- Speaker & Participant: Software Development Hackathon, Hello World Cup UNET (2025).
- Recognition: Scientific Project, UNET & Fundacite Science Festival (2025).
